✓ **Only one manikin required for both adult and paediatric BLS training**

- Use the Junior Conversion Kit on the Brayden adult manikin
- Less storage and less weight to carry

✓ **Brayden Junior is anatomically correct for a 10 – 12 year old boy**

- Excellent for Paediatric BLS instruction

✓ **Chest compression compliance and ventilation**

- Accurately reflects a child of 10-12 years old

✓ **No need for any other device (phone/tablet) so training is convenient, quick and easy to set up and assess**

✓ **Intuitive feedback lights on Brayden Junior work in the same way as the adult Brayden Adult**

- Makes training easy and consistent and ensures good quality CPR
